SUMMARY

Aspiring Data Scientist and AI/ML Engineer with hands-on experience building and deploying Machine Learning and Deep Learning solutions using Python, TensorFlow, Keras, and Scikit-learn. Skilled in data analysis, data visualization, and SQL, with a track record of designing end-to-end pipelines spanning data preprocessing, model development, and evaluation. Experienced in deploying interactive applications through Streamlit and backend systems using Flask, with practical exposure to healthcare prediction models and ERP business workflows.

SKILLS

Programming Languages: Python, SQL, Java

Machine Learning: Scikit-learn, Data Preprocessing, Feature Engineering, Exploratory Data Analysis (EDA), Model Evaluation

Deep Learning: Artificial Neural Networks (ANN), Perceptron, Forward Propagation, Backpropagation, Activation Functions (ReLU, Sigmoid, Softmax), Loss Functions (Categorical Crossentropy), Optimizers (Gradient Descent, Adam)

Libraries & Frameworks: TensorFlow, Keras, NumPy, Pandas, Matplotlib, FastAPI

Databases: MySQL, PostgreSQL

Tools: Git, GitHub, Jupyter Notebook, VS Code

EXPERIENCE

Python Developer Intern — CandidRoot Solutions Pvt. Ltd. *4 Months*

- Engineered and customized ERP modules using Python and the Odoo framework to streamline sales and inventory workflows
- Integrated and managed PostgreSQL databases with structured business datasets, strengthening backend operations and data reliability

PROJECTS

Heart Disease Prediction System GitHub Repository Live Demo

Python, Pandas, NumPy, Scikit-learn, Streamlit

- Built a Machine Learning model using K-Nearest Neighbors (KNN) to predict heart disease risk from patient medical data
- Performed data preprocessing, feature scaling, missing-value handling, and Exploratory Data Analysis (EDA)
- Achieved 88% prediction accuracy on test data through optimized model parameters

Iris Flower Classification using Artificial Neural Network (ANN) GitHub Repository Live Demo

Python, TensorFlow, Keras, Scikit-learn, NumPy, Streamlit

- Developed a Deep Learning classification model using an Artificial Neural Network (ANN) with TensorFlow and Keras to classify Iris flowers into three species
- Designed and trained a feed-forward ANN using ReLU and Softmax activation functions with the Adam optimizer and Categorical Crossentropy loss
- Achieved 96.67% test accuracy while optimizing training through hyperparameter tuning of epochs and batch size
- Saved the trained ANN model and preprocessing pipeline using .h5 and Joblib formats for deployment and future inference

FastAPI Product Management System GitHub Repository Live Demo

Python, FastAPI, Pydantic, REST API, Streamlit, CRUD, API Validation, JSON

- Developed a FastAPI-based Product Management API implementing CRUD, search, validation, pagination, and RESTful endpoints with JSON-based data storage.
- Built a Streamlit dashboard for product management and deployed the FastAPI backend and Streamlit frontend separately for live API interaction.

EDUCATION

Ganpat University | U. V. Patel College of Engineering *Graduation: 2026*

B. Tech in Information Technology | CGPA: 7.78

CERTIFICATIONS

- Python Essentials 1 – Cisco Networking Academy (2025): Python fundamentals, data handling
- OCI AI Foundations Associate (2025): Focused on AI, ML, and cloud-based data processing concepts
